# JIM KENNEDY

## Documentation Specialist

(+34) 684177773 | jimken123@gmail.com | jimkennedy.cv | linkedin

### Profile

Seasoned documentation professional with two decades of experience building and scaling knowledge bases and public docs sites for tech and gaming firms. Strong background in process creation, team leadership, and multilingual content. Building, scaling, and maintaining public-facing documentation websites, writing user guides and manuals; building online help systems; building and rolling out Atlassian Confluence instances, managing Wiki-content management systems; documenting features in release notes; editing a library of support articles, white papers, and application notes, and liaising remotely to build teams around the globe.

At Midokura, I shipped REST API documentation to the external client via a customer-facing docs portal that I built, and I oversaw internal informational content in the Confluence instance. At OneMind Technologies I overhauled ad hoc documentation, created new content, and steered the company towards a unified knowledge base. For King Games I built and managed the Confluence instance, recruited and oversaw a team of technical specialists, and built and ran several communications channels.

### Core Skills

Experience in documentation management systems and informational best practices.
Writing, compiling, and publishing technical manuals and documentation.
Building scalable CMS architecture and managing documentation growth.
Writing and reviewing technical content for global readership.
Working autonomously and across teams in technical and creative organisations.
Presenting information in a way that is concise and readily understood.
Atlassian suite administrator, qualified Scrum Master, Kanban user.

### Work Experience - Permanent Roles

**| MIDOKURA | BARCELONA | DOCUMENTATION SPECIALIST | 2021 - 2026 |**

Designed and implemented documentation structures and processes for the Sony subsidiary, establishing a unified knowledge base for internal and external audiences. I have iterated and delivered REST API documentation to Sony, I transitioned the content creation away from Google Docs and into Github and onwards to a documentation website which I built in Sphinx and ReadtheDocs. My other major projects have been championing the use of Confluence for internal-facing content and managing the JIRA instance.

**| ONEMIND TECHNOLOGIES | BARCELONA | TECHNICAL WRITER | 2019 - 2021 |**

As OneMind's first technical writer I devised and implemented a set of Documentation processes and procedures. I initially revised and edited all extant documentation across the company, and then wrote all new documentation and help files based on my identification and assessment of the acknowledge gaps. Working transversally, and mostly remotely, my overarching mission was to provide a single-point-of-entry for all tribal knowledge. I also translated customer-facing documentation from Spanish to English.

**| KING GAMES | BARCELONA SENIOR SYSTEMS ENGINEER | 2013 - 2017 |**

Initially I built King's Atlassian Confluence instance, and during the company's explosive growth phase I grew it to become the company's primary repository of shared information. As headcount at the hugely successful games company grew, I scaled the internal wiki accordingly, from a few hundred pages to tens of thousands of pages, blog posts, video presentations, meeting notes, and all games knowledge. King's Confluence is now the company's preeminent knowledge base; it is the first point of contact when seeking information on all internal matters.

In my leadership role I recruited and directed a team comprising a Confluence expert, a technical administrator, and a technical writer. I also worked to define and evolve a sensible structure of documentation, presentations, and videos. I also curated such content induction material, roadmaps, API

descriptions and best practice documentation. My objectives were to prioritise the production of documentation, presentations, best practice guides, tech talks. needed for game teams to understand what is available and how to use it. I built and ran several other communications channels, including HipChat, Slack, Trello, public-facing tech blog, social media.

**| RIPLIFE GAMING | BARCELONA AND MALAGA | DOCUMENTATION MANAGER | 2010 - 2012 |**

Based in Riplife Gaming Technologies' Barcelona office, I organised and supervised the flow of technical system information around the company's global sites. I managed a team of technical writers to design, deliver, and maintain an Atlassian Confluence Wiki as the primary content management system for IT-facing support documentation. Initially the role involved building a team, mapping the company's knowledge storage requirements, and delivering a framework for organising the existing documentation. Managing my team, I evolved the role to create and impose a formal documentation structure based on business requirements, reduce the existing footprint by 50%, and build a scalable architecture for growth.

**| SYNOPSYS | DUBLIN | SENIOR TECHNICAL WRITER | 2006 TO 2010 |**

As Senior Technical Writer I provided documentation and online help systems for a range of software design products, liaised with global teams and built working relationships with remote colleagues, and drove the publications agenda. As the sole writer on the company's flagship new product, I developed 100% of the customer-facing online help systems, then built and maintained that documentation resource.

## Work Experience - Freelance Roles

**| TYPEFORM | BARCELONA | TECHNICAL PROOF-OF-CONCEPT | 2021 |**

Contracted to deliver a working model of Atlassian Confluence as a internal wiki for Typeform, the company behind the software tool that lets you build stylish interactive forms. This was a proof-of-concept for migrating the company from Notion to Confluence.

**| IOV | BARCELONA | TECHNICAL WRITER | 2018 - 2019 |**

Supplied 100% of this startup Fintech blockchain company's Technical Writing requirements as it approached product launch. I wrote and edited marketing materials and Medium blog posts aimed at early adopters, as well as more technical documentation and help files for end-users of the wallet.

**| STRATA3 | DUBLIN | INSTRUCTIONAL DESIGNER | 2010 |**

Developed and wrote all the webhelp content for the Strata3 content management system. Strata3's product set manages all aspects of a corporate online presence, including publishing website content, running a blog, managing an ecommerce storefront, and running email and newsletter promotions. The project called for the creation of the entire help files and user guides for the flagship offering from this startup company.

## Software

Atlassian Confluence, JIRA, GitHub, Codeberg, Markdown (.md), reStructured Text (.rst), Visual Studio Code, Git, Plausible Analytics, Sphinx, ReadtheDocs, Zendesk, Slack, WordPress, Adobe FrameMaker, MadCap Flare, Bitbucket, Webex, Meeting Manager, Microsoft XP, SharePoint, Google Suite, and Office Suite (Access, Excel, FrontPage, Outlook, Project, PowerPoint, and Word), UNIX, PageMaker, Lotus Notes R5, HTML, XML, CSS, Network Essentials, Authorware, Perforce, Macromedia Dreamweaver and Fireworks, AuthorIT, Photoshop, and Visio.

## Soft Skills

Problem solving.
Establishing contacts within an organisation.
Developing collaborative relationships across groups.
Resolving differing group objectives.
Native English; conversational Catalan, Spanish, and French.

## Education

Master's Degree in Opto-Electronics and Information Processing - Queen's University of Belfast
Honor's Degree in Applied Sciences (Physics, Chemistry, and Mathematics) - Trinity College Dublin
Diploma in Applied Sciences (Physics, Chemistry, and Mathematics) - Dublin Institute of Technology
